

Ahmed Yehia

Senior MERN Stack Developer

Cairo, Egypt | +20 111 327 1757 | ahmed.yehia.abdulgawad@gmail.com | github.com/Ahmed-yehia12 | linkedin.com/in/ahmed-yehia-95a75420b

PROFESSIONAL SUMMARY

Senior MERN Stack Developer with 3+ years of experience building scalable, secure, and high-performance web applications using React, Node.js, NestJS, and SQL/NoSQL databases. Delivered fintech and crypto-trading systems, CRM platforms for brokerage operations, real-time chat products, and logistics solutions. Strong in backend architecture, event-driven systems, API integrations, team leadership, and clean, maintainable frontends. Currently leading a team of 6 developers at Finitic while driving delivery across multiple fintech and crypto platforms. Recognized as Employee of the Month for 4 consecutive months for performance, ownership, and delivery consistency.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, Redux / Redux Toolkit, Redux-Saga, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Bootstrap 5, Tailwind CSS, AJAX
Backend:	Node.js, Express.js, NestJS, REST APIs, GraphQL, Socket.io, RabbitMQ, JWT Auth, OOP
Databases:	MongoDB, MySQL, PostgreSQL, NoSQL
Tools:	Git/GitHub, Mongoose, Prisma ORM, Sequelize ORM, Cloudinary, Multer, Joi, Bcrypt.js, Regular Expressions, CI/CD basics, Agile / Scrum

PROFESSIONAL EXPERIENCE

Finitic — Senior MERN Stack Developer (Fintech / Crypto) UAE (Hybrid) | Sep 2024 – Present

- Designed and developed core backend systems for multiple fintech products including a trading platform, cryptocurrency payment gateway, and subscription management services.
- Built secure trading and wallet APIs using NestJS/Node.js with strong authentication, validation, and RBAC.
- Integrated asynchronous transaction pipelines using RabbitMQ, ensuring reliable syncing across partner platforms.
- Implemented real-time tracking features for client positions, orders, and transaction history.
- Collaborated directly with founders and designers to deliver pixel-accurate React interfaces.
- Awarded Employee of the Month for 4 consecutive months for exceptional delivery and system ownership.
- Led a team of 6 developers for the last 5 months, overseeing sprint delivery, code reviews, and technical decisions.

Why Not Tech — MERN Stack Developer Türkiye (Remote) | May 2024 – Sep 2024

- Built a classified-ads marketplace enabling users to buy, sell, and trade products/services.
- Developed RESTful APIs for both client features and a full admin management panel.
- Implemented secure authentication/authorization with JWT and role-based access.
- Delivered real-time buyer/seller chat using Socket.io.
- Supported payment gateway integration and notification workflows.

Tawseela Express — Software Developer (MERN) Maadi, Cairo | Feb 2023 – May 2024

- Developed a delivery logistics platform supporting Customers, Captains, and Operators.
- Built responsive React dashboards for shipment creation, assignment, and tracking.
- Implemented backend services using Node.js + MongoDB for shipments, roles, and cash reconciliation.
- Delivered operator tools including daily shipment sheets, captain management, and performance views.

KEY PROJECTS

Trading App (TPSS Trading Platform)

- Built a full trading system allowing clients to execute trades and track open positions in real time.

- Developed backend services with NestJS and implemented order lifecycle, exposure calculation, and secure portfolio views.
- Tech: NestJS, React.js, PostgreSQL.

Forex CRM System (Brokerage CRM)

- Developed a CRM for brokerage companies to manage clients and monitor trading activity on MT4/MT5.
- Integrated MT4/MT5 accounts, trades, balances, and commission/rebate engines into client profiles.

Crypto CRM System

- Designed and delivered a CRM platform for crypto-fintech operations with dashboards for KYC, client lifecycle, and transaction monitoring.
- Integrated trading and payment systems with secure audit trails and real-time transaction visibility.

Crypto Payment Gateway

- Built a multi-currency crypto payment gateway enabling merchants to accept crypto and track conversions.
- Implemented wallet handling, transaction verification, callbacks, and automated reconciliation.

Dalelok Platform

- Developed a marketplace-style platform similar to Dubizzle, enabling users to post listings with categories, images, and detailed descriptions.
- Supported filters, profiles, listing management, and scalable backend APIs.

Saraha App (Anonymous Messaging)

- Built an anonymous messaging app allowing users to send and receive messages without revealing sender identity.
- Included inbox management and secure user sessions.

Daily Tasks System

- Delivered a task-tracking system that shows company-wide workload visibility.
- Helps managers track workloads, assignments, and employee capacity in real time.

FreshCart — E-Commerce Platform

- Developed a full-stack e-commerce solution with product catalog, cart, checkout, orders, and payments.
- Built scalable REST APIs, secure authentication, and optimized UI performance.
- Tech: React.js, Node.js, Express.js, MongoDB, Stripe.

EDUCATION

Helwan University — Bachelor of Law

2016 – 2020

Route Center — MERN Stack Track

Maadi, Cairo | Mar 2022 –
Dec 2022

ACHIEVEMENTS

- Employee of the Month for 4 consecutive months at Finitic for delivery speed, ownership, and impact.
- Promoted to Senior MERN Stack Developer after demonstrating strong technical ownership and leading a team of 6 developers.
- Built core backend services for trading and crypto payment products, including real-time positions and transaction syncing via RabbitMQ.
- Integrated MT4/MT5 and TPSS trading platforms, ensuring accurate reflection of trades, positions, and commissions in client profiles.
- Developed automated IB commission & rebate engine, reducing manual processing and improving calculation accuracy.

SOFT SKILLS
